### Striving For Cultivating Talented Future Leaders

Mito Daini SHS has been dedicated to producing a great number of excellent leaders, in its effort to achieve its goal of creating leaders with grace and culture, since it was founded as a girls' secondary school in 1900. Our school provides an excellent education under three pillars: *Career education, Math and science Education and Education for Cross-cultural Understanding*. About 1000 female students are deeply involved in academic and extra-curricular activities.

In regards to Career Education, we provide an education that meets our students' needs to realize their desired course after graduation. This year 139 students were accepted to national and public universities straight from our school, which is an excellent achievement.

As for Math and Science Education, we have been appointed by the Ministry of Education for a third term as a "Super Science High School", which is a high school to cultivate promising scientific and technological human resources. We conduct an annual overseas seminar and various presentations hoping to nurture scientists who are active worldwide.

When it comes to Education for Cross-cultural Understanding, we provide our students with opportunities to do research on and experience Japanese culture as part of a program where leaders with the global perspective greatly desired in the global society are developed.

Finally for club activities, the students are very active and some clubs, such as naginata and the chorus even proceed to national competitions.

With opportunities like taking part in the Super Science activities (in their 12<sup>th</sup> year), and overseas study in the USA and Australia, in addition to club activities, our students passionately enjoy both their studies and their extracurricular activities.

Junior-high school students, it is certain that at Mito Daini there is something that you can become absorbed in. Why don't you utilize your talents at our school?

Fuyu Toyoda  
(one of our school's  
founders)

The Second Bulding  
(Built in 2013)

Kodokan  
(The location where our  
first classes were held)

# Clubs ~Fighting Towards Our Ambitious Goals~

## Sports clubs

Basketball

Volleyball

Badminton

Japanese Archery

Soft Tennis

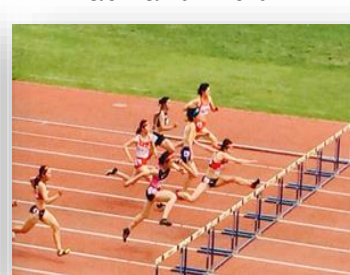

Tennis
